CHEMISTRY

Paper 1

July /August

2 Hours

AITEL JOINT MOCK ASSESSMENTS 2025

Uganda Certificate Of Education

CHEMISTRY

Paper 1

Theory

2 Hours

INSTRUCTIONS TO CANDIDATES:

The paper consist of two sections A and B

It has six examination items

Section A has two compulsory items.

Section B has two parts I and II. Answer one item from each part

Answer four items in all

Answers to section A must be written in the spaces provided while those of section B must

be written on the answer booklet provided

Any additional item(s) answered will not be scored

SECTION A

Answer all the items in this section in the spaces provided.

ITEM 1

Shafie has a restaurant in Manafwa city and the customers have these days abandoned his restaurant because of the poor taste of the food, unpleasant scent and food gets spoilt after a short period of time and the soup is always watery, compared to the food of other restaurants which have brought miss understanding between themselves and he wishes to acquire different substance which would be added in his food and he has contacted you as a chemistry student well knowing that you can advise him on the right product to buy.

Task:

As a chemistry student write a piece of advice on

(i) Categories of the products to be bought

.....

.....

.....

(ii) Explain the suit abilities of the different products

.....

.....

.....

.....

.....

(iii) Educate him on the side effects of the long term of the product

.....

.....

.....

(iv) Guide him on how to choose the best product to be used

.....

.....

.....

.....

ITEM 2

In Uganda today NCDC has trained teachers country wide on how to use project based learning (PBL) in teaching and learning to impact skills in tomorrow's Uganda and these made a group of students to buy a package of materials indicated X1327 to be used in the making of source pans as a project to solve the problem of poor quality source pans in the community and to get ready for the presentation; prepare the information to talk about the following.

Support material

Task.

As a chemistry student help them to know

(i) What category of the element did they choose.

.....

.....

.....

.....

(ii) What makes you believe that this element will be able to make a good source pan for them

.....

.....

.....

(c) Advise the group of students on the possible dangers associated with the long term use of the source pans made of element x.

.....

.....

.....

(d) State any other use of the element x apart from the above use

.....

.....

.....

SECTION B

Part I

Answer only one item from this part. Answers should be written in the answer booklet(s) provided.

ITEM 3

In the areas of Namisidwa and Bubutu people have registered low agricultural output of onions and tomatoes yet they depend on them as a source of income and they reported the concerns to the district agricultural officer who responded and tested the soil and found out that there is very low nitrogen content and advised them to apply a high nitrogen content fertilizer to improve on their outputs and these made the district officials to clear an investor to set up a fertilizer production plant in the district and locals are worried of the likely outcomes and how the process will occur; they keep doubting its impact to their social being and also claim that the government wants to take up their valuable land in the process, you have been invited to a radio talk show to a local radio station to sensitize the citizens about their concerns.

Support material

Task.

As a learner of chemistry, make a write up that you will use to sensitize the citizen of the region

ITEM 4

Nitrogen is used in food and beverage to create an inert environment and to extend the shelf life of food products like meat, dairy and fruits, with more supermarkets; shopping malls arising in the country due to the increase in the population, this has led to the increase demand for nitrogen because of its use, an investor has opted to open up an oxygen production plant in Batabala and Mbale City, however the residents of the respective areas need to be sensitized about the production process of nitrogen;

A meeting with the community has been organized and your school has been identified and invited to sensitize the residents.

Support material

Task

As a learner of chemistry, prepare a writeup that you would use to sensitise the residents of the two areas.

Part II

Answer only one item from this part. Answers should be written in the answer booklet(s) provided.

ITEM 5

Bukusu is a hilly place in eastern Uganda, the youth in Bukusu have practiced brick laying and cutting down trees to burn the clay bricks and sell some as firewood to earn the living. In addition to the above they also practice fishing using small nets and sometimes poison to maximize more fish from the nearby water body and these human activities have resulted into the shortages of fresh water and agricultural output have lowered with the death of livestock and human beings.

Support materials

The community leaders have organized a meeting to sensitize the other community members and you have been invited to represent the school

Task

As a chemistry student make a work up you will display upon invitation

ITEM 7

The people of Bulambuli rocky hills in north eastern Uganda depends on majorly on stone quarrying as a primary source of income, however extensive quarrying has resulted into seasonal changes, water shortage and reduced air quality and water contamination which has raised concerns to the area leaders and NEMA, the area leaders has organized the sensitization workshop and you have selected to educate your community about the issue at hand.

Support materials

Task

As a chemistry student, make a write up to sensitize your community upon selected.

END
